EIA-0218(85/32) bution Category UC-98

'eekly Coal roduction

Energy Information Administration Washington, D C

Contains Supplementary Data

Preface

Contents

The WCP

The Weekly Coal Production (WCP) provides weekly production estimates of U.S. coal by rank, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. Weekly Coal Production is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly Coal Distribution Report and the Quarterly Coal Report.

General information about this publication may be obtained from Robert Harris, Chief, Data Systems Branch, Kenneth Shanks, or Judith Wood. For specific information on the contents of this publication contact the National Energy Information Center (NEIC) at (202/252-8800).

Highlights

U.S. coal production in the week ended August 10, 1985, as estimated by the Energy Information Administration, totaled 18.19 million tons (bituminous coal and lignite, 18.12 million tons; Pennsylvania anthracite .07 million tons). This was 0.7 percent lower than the previous week, and was 7.1 percent lower than in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through August 10, 1985 was estimated at 534.57 million tons, 4.2 percent below the 557.85 million tons produced in the comparable period in 1984.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DDE/EIA-0218(84/40)).
